About us

We FanAir India Pvt Ltd as one of the leading and Pioneer Manufacturers, Engineers and Equipment & Service Providers of Air Management Equipments in the field of HVAC Industry & as a group, company was incorporated in the year April 2003 as manufacturers of Complete Air Management Solution Products - to carry forward the Ancestral tradition to stick to the technical trade/business/profession in one form or the other Since then it has never looked back and has become a name to reck on with in the manufacturing of comprehensive range of Air Management Solution Products mainly pertaining to HVAC industry.

We are manufacturing Pre-Fabricated Ducts, Axial Flow Fans, Forward Curved Blowers, and Centrifugal blowers, Backward Curved Blowers, Plug Fan, Jet Fans, Smoke Exhaust,Kitchen Exhaust Unit,Wet Scrubber, Dry Scrubber, Air Washers & Air Curtains etc…

Keeping in view our dedication, sincerity, hard work and over and above our aim to create a quality product, enabled us to overcast the market. We firmly believe that the best quality products can only be developed through technical advancement; updated machinery; skilled workforce and professional approach including stringent initial raw material inspection, stage wise inspection and the final checks prior to dispatch of each and every product.

We have a team of highly experience engineers who have vast experienced, integration of technology, expertise, business trust, quality of product, integrity, team work, customer oriented & accountability, unrelenting efforts carve a niche of excellence for customers.

We are pleased to work with you for your project and get associated for a mutually beneficial relationship.

Our Aim

To rank and stay within top Indian companies engaged in our sector by delivering quality products.

Research & Development

Ensuring proper feedback from every nook & corner is we aim for. Everyone in all segments,in the chain provides input which is very vital for research and development.This participation helps us to iron out every unaddressed issue.

Our Strengths

- High grade raw material.
- Leadership in product innovation.
- Continous R & D of products
- Optimum functionality
- Highly efficient, Low- Cost manufacturing.
- Energy saving features

Our Vision

We would like to be the most reliable & innovative manufacturer of blowers & HVAC products as regarded by our customers globally.

Our Mission

We will work as a team with full dedication towards acheiving operational excellence and thus strive for value creation for our customers.

Our Quality Policy

The right way is to use experts is every step of the way - to research rigorously, in - depth and apply punctilious detail to tried and trusted methods, examining the special technical characteristics of every single project and to anticipate problems, whether apparent or unseen. Due to our tight quality control specialists, we have received the ISO 9001 : 2015 certification and assure the quality of our products.

New Facility

Our new state-of-art manufacturing setup spreads over 110000 sqft at Ghiloth Industrial area, RIICO, Neemrana, Rajasthan.

FABI SERIES

Double Inlet Double Width Backward Curved Fan

FABI F

FABI P

FABISD

FAPF

FABISB

Introduction

FABC Series is a Double Inlet Double Width (DIDW) centrifugal blower with Backward Inclined wheel. These fans are suitable for Supply & exhaust application in commercial & industrial (HVAC) systems Maximum operating speed and power of each fan type is due to its mechanical design The operating limit of different fan types of FABC series is set according to the requirement of Class I, II & III limit as defined in **AMCA Standard** 99-16.

TECHNICAL SPECIFICATION

Wheel

The wheel of FABI series is made of Mild Steel backward inclined blades. To obtain maximum efficiency & low noise level, these wheel are specifically profiled. A die cast aluminum hub a precisely machined bore key is fitted to the wheel plates. The wheel is statistically & dynamically balanced.

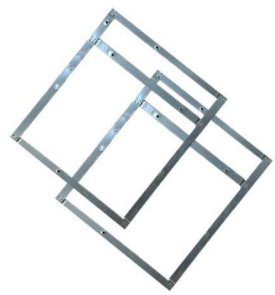

Housing

The housing is manufactured in galvanized sheet steel with the housing fixed to the side plates by using pittsburg lock for sizes.

Frame

For the “L” leg is made of GI sheet which is manufactured by processing of punching and bending in the way that ensures correct dimensions and also maximum rigidity in its class. For type ”F” frames are of GI sheet angle at which GI sheet is sheared, bent and spot welded to form a rigid frame to provide strength and stability to the fan.

Shaft

Shafts are manufactured from EN8 carbon with key ways at both ends and at the center for hub wheel. All the dimension tolerance of the shaft are fully checked to ensure a precision fit. All the shafts are coated with anti-corrosion varnish after assembly

Bearings

All the bearings used are deep groove wall ball bearings type sealed at both side. The bearings are self-aligning with an eccentric collar for clamping onto the shaft and each bearing shaft and each bearing sits in the side of moulded rubber housing. All the bearings are lubricated forlife maintenance free under a normal operating conditions

www.fanair.in

FABI F Series

Double Inlet Double Width Belt Driven Backward Inclined Fan

Intrduction

FABI F series has a frame fitted on both sides of the fan which gives better strength and rigidity. It allows mounting in four different orientations.

Specification

Size :- 180 mm to 710mm

Capacity:- upto 20000 CFM

Static Pressure :- upto 200 mmwg

FABI P Series

Double Inlet Double Width Belt Driven Backward Inclined Fan

Intrduction

FABI P series has a welded frame, giving increased stiffness and rigidity required for higher operating performance.

Specification

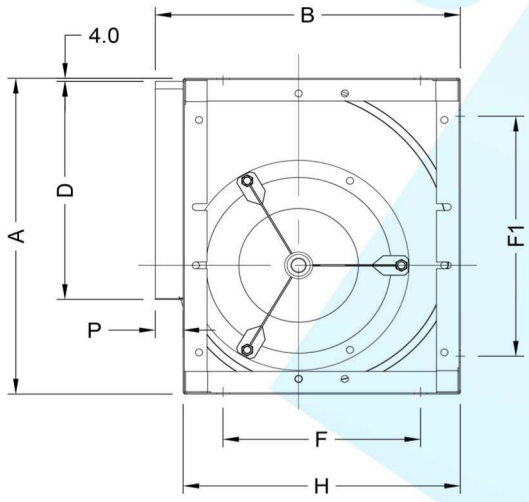

Size :- 800 mm to 1250 mm

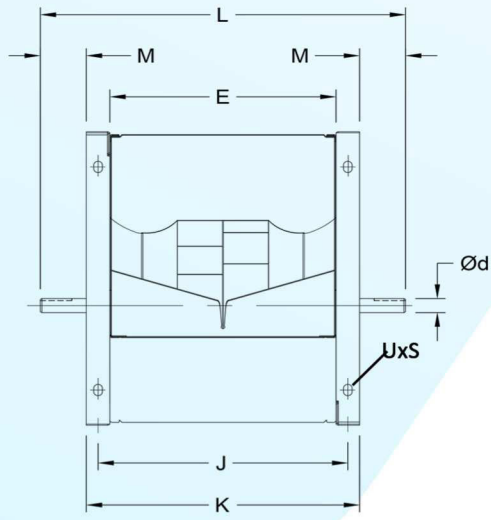

Capacity:- upto 60000 CFM

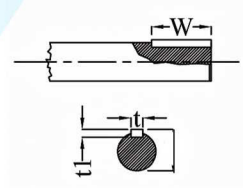

Static Pressure :- upto 200 mmwg

FABI Series

www.fanair.in

FABISD Series

Single Inlet Single Width Direct Driven Backward Inclined Fan

Intrduction

FABISD series has a frame fitted on one sides of the fan which gives strength and rigidity. Generally used for Exhaust of various applications like Dust Collector, Kitchen Exhaust, Industrial Exhaust.

Specification

Size :- 180 mm to 1250 mm

Capacity:- upto 30000 CFM

Static Pressure :- upto 200 mmwg

FABISB Series

Single Inlet Single Width Belt Driven Backward Inclined Fan

Intrduction

FABISB series has a frame fitted on one sides of the fan which gives strength and rigidity. Generally used for Exhaust of various applications like Dust Collector, Kitchen Exhaust, Industrial Exhaust.

Specification

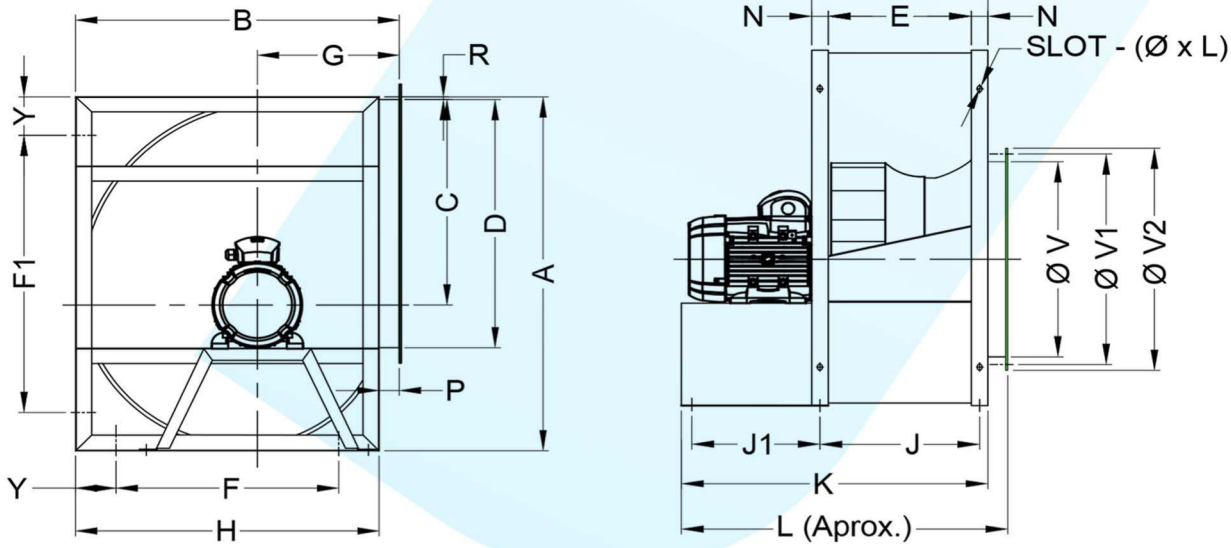

Size :- 180 mm to 1250 mm

Capacity:- upto 30000 CFM

Static Pressure :- upto 200 mmwg

FABI Series

www.fanair.in

FAPF Series

Single Inlet Single Width Backward Inclined Plug Fan

Intrduction

Plug Fan (FAPF) are the Backward Incline Centrifugal Fans which generally do not have the housing, it is known as Open Type Fan. Generally used in Pharma Industries, Fan Section

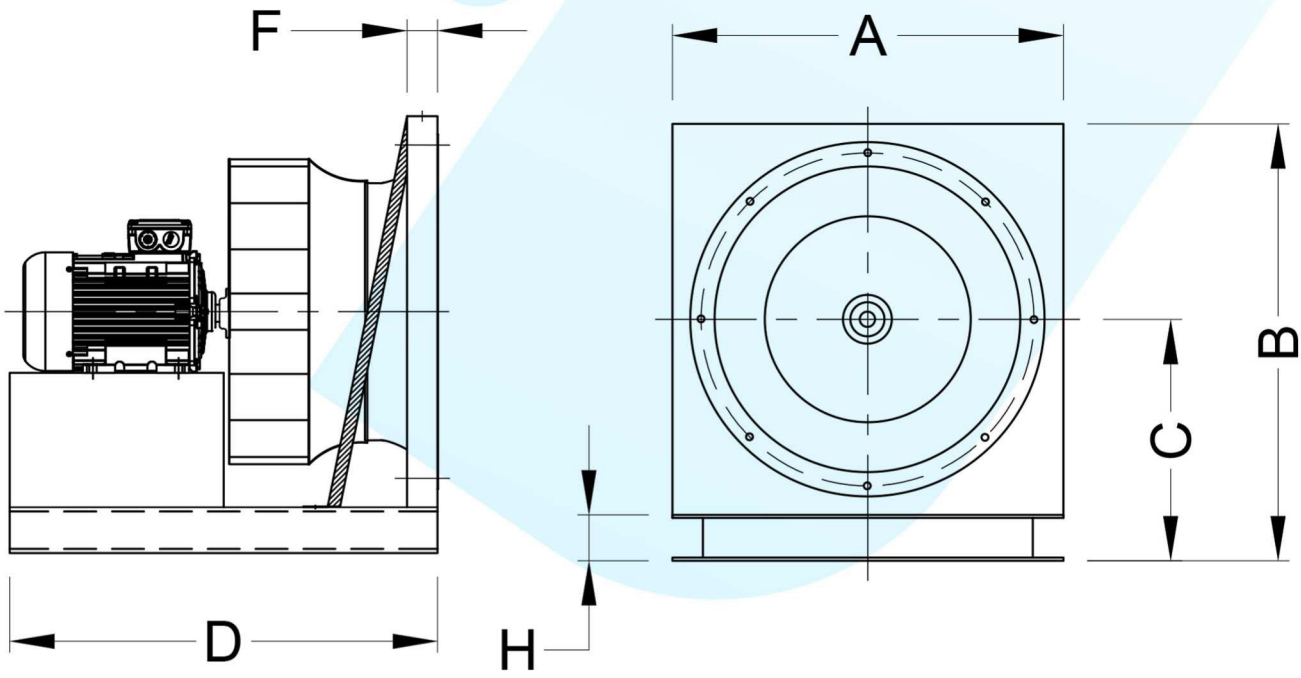

Spectification

Size:- 315 mm to 1000 mm

Capacity:- upto 30000 CFM

Static Pressure:- upto 200 mmwg

Technical Details

FAPF- 315 - 1120

MODEL	A	B	C	D*	F	H
315	440	515	295	500	50	75
355	484	559	315	550	50	75
400	534	609	365	580	50	75
450	590	665	295	600	50	75
500	640	715	320	700	50	75
560	700	775	425	730	50	75
630	800	875	475	750	50	75
710	860	935	505	845	50	75
800	950	1050	575	1050	50	100
900	1100	1200	650	1150	50	100
1000	1200	1200	700	1260	50	100
1120	1320	1420	760	1360	50	100

NOTE:

* All dimensions are in mm and it may vary at the time of production
* D* (DIM. MAY CHANGE AS PER THE CHANGE IN MOTOR SIZE)
* IMPELLER MOC: MS, FAN BASE MOC: MS, MOTOR BASE MOC: MS, INLET SECTION MOC: GPSP
* TOLERANCE ±5 MM.
