About us

We FanAir India Pvt Ltd as one of the leading and Pioneer Manufacturers, Engineers and Equipment & Service Providers of Air Management Equipments in the field of HVAC Industry & as a group, company was incorporated in the year April 2003 as manufacturers of Complete Air Management Solution Products - to carry forward the Ancestral tradition to stick to the technical trade/business/profession in one form or the other Since then it has never looked back and has become a name to reck on with in the manufacturing of comprehensive range of Air Management Solution Products mainly pertaining to HVAC industry.

We are manufacturing Pre-Fabricated Ducts, Axial Flow Fans, Forward Curved Blowers, and Centrifugal blowers, Backward Curved Blowers, Plug Fan, Jet Fans, Smoke Exhaust,Kitchen Exhaust Unit,Wet Scrubber, Dry Scrubber, Air Washers & Air Curtains etc…

Keeping in view our dedication, sincerity, hard work and over and above our aim to create a quality product, enabled us to overcast the market. We firmly believe that the best quality products can only be developed through technical advancement; updated machinery; skilled workforce and professional approach including stringent initial raw material inspection, stage wise inspection and the final checks prior to dispatch of each and every product.

We have a team of highly experience engineers who have vast experienced, integration of technology, expertise, business trust, quality of product, integrity, team work, customer oriented & accountability, unrelenting efforts carve a niche of excellence for customers.

We are pleased to work with you for your project and get associated for a mutually beneficial relationship.

Our Aim

To rank and stay within top Indian companies engaged in our sector by delivering quality products.

Research & Development

Ensuring proper feedback from every nook & corner is we aim for. Everyone in all segments,in the chain provides input which is very vital for research and development.This participation helps us to iron out every unaddressed issue.

Our Strengths

- High grade raw material.
- Leadership in product innovation.
- Continous R & D of products
- Optimum functionality
- Highly efficient, Low- Cost manufacturing.
- Energy saving features

Our Vision

We would like to be the most reliable & innovative manufacturer of blowers & HVAC products as regarded by our customers globally.

Our Mission

We will work as a team with full dedication towards acheiving operational excellence and thus strive for value creation for our customers.

Our Quality Policy

The right way is to use experts is every step of the way - to research rigorously, in - depth and apply punctilious detail to tried and trusted methods, examining the special technical characteristics of every single project and to anticipate problems, whether apparent or unseen. Due to our tight quality control specialists, we have received the ISO 9001 : 2015 certification and assure the quality of our products.

New Facility

Our new state-of-art manufacturing setup spreads over 110000 sqft at Ghiloth Industrial area, RIICO, Neemrana, Rajasthan.

FAN SECTION UNIT

Introduction

FA FC double skin belt driven cabinet fan section is an ideal solution for supply & exhaust application including fresh air, exhaust air, make-up air, return air to deliver air capacity ranging from 1000 CFM to 40000 CFM. Our FA FC Series comes with multiple air filter & discharge options.

Ventilating a building simply replaces stale or foul air with clean, fresh air. Although the ventilation process is required for many different applications, the airflow fundamentals never change: Undesired air out, fresh air in. The key variables that do change depending on applications are the fan model and the air volume flow rate (CFM). Other considerations include the resistance to airflow (static pressure or SP) Sometimes you need a exhaust fan to perform a particular function, but it's not clear which model to use or even what CFM is needed. If this is the case, you'll need to do some fan specification work Fan specification is not an exact science, but it can be done confidently when the fan application

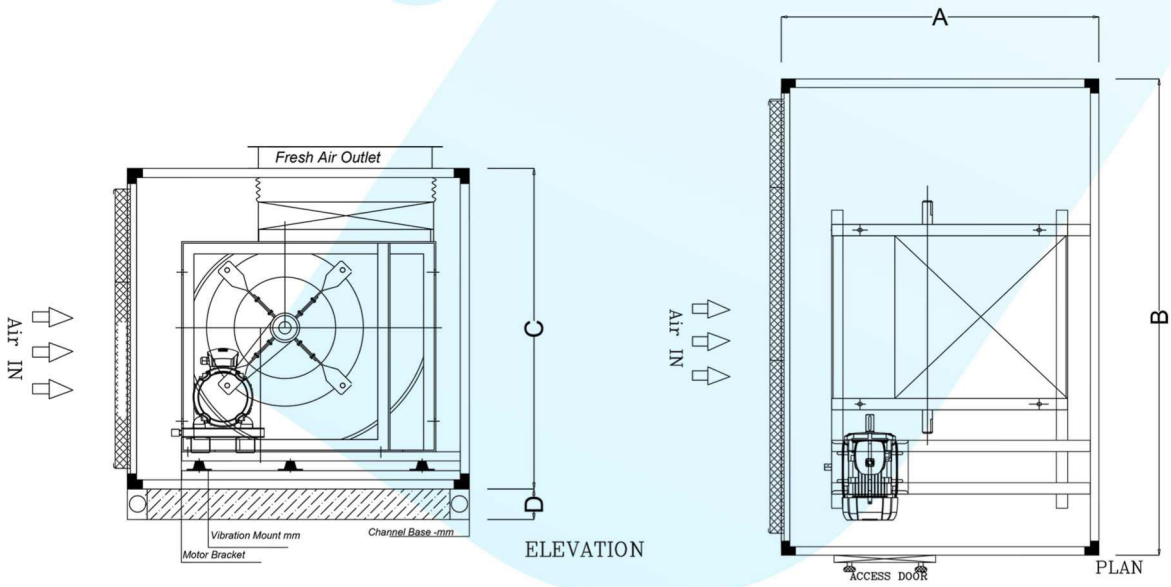

Exhaust fans force out stale indoor air so it can be replaced by fresh outdoor air. They're commonly used to reduce moisture and remove smoke and odors in restaurants, residences, shop and production floors , and commercial buildings. Exhaust fans mount through a cutout in a roof or wall. Belt - driven exhaust fans handle large volumes of air at low static pressures. They run more quietly and allow greater control over fans speeds than direct-drive exhaust fans. Direct-drive exhaust fans have their motor mounted on the fan shaft, so they are more compact and have fewer moving parts than belt-driven fans.

Application:-

- Lift Lobby
- PVR Cinema
- Hotel Industry
- Educational Institue
- Chemical Indutries
- Shopping Malls
- Laundry
